

# C#/.NET DEVELOPER

## INTRODUCTION

Amaris is an independent, international Technologies and Management Consulting Group. Created in 2007, Amaris is already established in over 50 countries and supports 500 clients worldwide throughout their projects' lifecycle. Our expertise covers 5 areas of innovation: Business and Management, IT/IS, Telecom, Engineering and High Technologies, Biotech and Pharma. With 65 offices across the World, the Group offers proximity support to its clients in all their locations and many opportunities of international careers for employees.

In 2018, Amaris aims to reach a turnover of 260 million euros, 5000 employees and to develop its workforces with the anticipation of a further 2000 new job openings. We expect to triple our workforce within the next few years and reach a leading international position in independent consulting.

## JOB DESCRIPTION

### Your main responsibilities:

Most of Amaris applications are designed from scratch and raise challenges on different area of knowledge as Business Intelligence, user-friendly aspect or efficiency. You will work on many projects that carry varying responsibilities. Below are some examples of the diverse projects with which you might be involved:

- ◀ Write server-side code for web-based applications, create robust high-volume production applications, and develop prototypes quickly. This applies particularly to our recruitment application.
- ◀ Build our Information System used by almost a thousand of employees around the world, crossing different domains as HR, Finance, Business, and all other corporate functions.
- ◀ Design the project using appropriate technologies and framework (Ajax, JQuery, .Net, JavaScript...) to be efficient while giving the best UI.

## IDEAL CANDIDATES

- Graduated from engineering school in Computer Science or related technical discipline (or equivalent), looking for a career in an international environment.
- Approximately 2-to-7-years' programming experience in OOP (C# / ASP.NET MVC preferred) as well as database knowledge (SQL Server preferred).
- A solid foundation in computer science, with strong competencies in data structures, algorithms, and software design.
- Being passionate by development or highly motivated to improve your Microsoft development skills.
- Business proficient level of English in order to attend meetings with other development teams in Europe, give support to your applications, help project managers and architects take the best decision, document your work.

## WHY US?

- Being part in an International and multicultural environment
- Fast growing global company, opportunities to grow quickly with a Taylor made career path
- Soft skill trainings: interpersonal communication, team management, project management.
- Team lunch, after-works and other successes celebrations
- Ability to support non profit organizations
- You will have the opportunity to unlock your potential, both professional and personall
