

# About Nexon

Nexon is driven by the ongoing quests to provide the best gaming experience around the world.

Since its inception in 1994, NEXON has created many industry firsts through its rich creativity and exceptional development talent. In 1996, NEXON has released the world's first graphic MMORPG, 'The night of the Winds' and in 1998, NEXON was the first to introduce the Free to Play business model through 'Quiz Quiz'. NEXON continues to solidify its unique and creative DNA by servicing innovative titles such as 'KartRider', 'MapleStory', 'Mabinogi', 'Dungeon&Fighter', and Sudden Attack'.

## Nexon Networks is the largest game service company in Korea

We are responsible for customer service and QA of all games developed or published by Nexon.

We deliver the best gaming experience to users providing QA and CS services for many games. As a member of Nexon Company, a global game company, we are leading the global game market and striving to create a pleasant workplace where employees and company grow together.

Now, we will establish and grow a subsidiary in Vietnam. We are waiting for talented people who can make our start special.

## And What we do

Game Quality Assurance is responsible for game testing process and quality control. Unlike any other software QA, we should find the factor which interrupts 'user's fun'. This is the reason why we've established a new company and focused on recruiting new colleagues in Vietnam. Nexon Networks Vina can help global gamers who'd love games to feel more enjoyable.

We want to work together with people who can test games and manage bugs. We believe that you can be part of us and grow up as a QA expert who's in charge of gamer's fun.

*We always work  
with joy*

*We try our best  
to achieve better quality*

*Employees and company  
grow together.*
